

**Key**

- Red Line Boundary
- Radii from turbine centres
- Proposed turbines

**Hub Height ZTV - No. of proposed turbines theoretically visible**

- 1 to 3 proposed turbines visible
- 4 to 6 proposed turbines visible
- 7 to 9 proposed turbines visible

NB The Zone of Theoretical Visibility (ZTV) image illustrates the theoretical extent of where turbines will be visible from assuming 100% visibility. It is generated using terrain data only and does not take into account any screening that vegetation or the built environment may provide. It is 'as such' a worst case ZTV and the actual extents of visibility are likely to be much less extensive.

Hub Height ZTV up to 35km – South-East Quadrant

**Garcrogo Wind Farm**
