

>>> The Proposed Development

Divot Hill Wind Farm

- The planning application will be for the development of a wind farm at Divot Hill of up to 9 wind turbines, each up to 200m in height to blade tip.
- The Divot Hill site is located approximately 6km to the north east of St John's Town of Dalry.
- A decommissioning bond would be held by the local authority to decommission the project and restore the site.

Divot Hill and Margree

- The Divot Hill turbines occupy the southern part of the wider Margree Wind Farm site, which was approved in March 2022.
- Both projects are for 9x 200m turbines each and would share certain infrastructure such as access tracks and the main site entrance.
- The plan to the right shows the proposed Divot Hill turbines (generally to the south of the site) relative to the approved Margree turbines (generally to the north of the site).
