GDLO0266	Lochryan	Lochryan House and garden and designed landscape (GDL) are located less than 1km to the southwest of the proposed development. Lochryan GDL is situated on the eastern shores of the inlet of Loch Ryan. It is an attractive formal early 18th century landscape of parkland and woodland blocks and strips, with woodlands and walks, a formal garden and large walled garden. The GDL is of outstanding historical and architectural interest, which provides the setting for the Category A listed Lochryan House. Dating from 1701 with early 19th century alterations, Lochryan House forms the focal point of its Inventory designed landscape. The front elevation faces SW along its axial entrance drive giving views across the gardens towards Loch Ryan. Set in formal gardens and flanked by woodlands, the upland moorland to the east forms the backdrop of the mansion and views can be gained from Lochryan north to Laird's Hill and east to Cairn Hill. The turbines may be visible in these important views.	206668	569206	Garden and Designed Landscape	Partly within ZTV	Wider landscape setting of asset contributes to significance. Impact possible in principle	Detailed assessment required	http://portal.historicenvironment.scot/designation/GDL00266
SM7073	Drumacissock, hut circle 990m SSE of Awies		211650	568415	Scheduled Monument	Within ZTV	Setting that contributes to significance potentially includes the proposed development area. Impact possible in principle	Asset visited for stage 1 screening assessment. It is considered that these archaeological remains are appreciated in their local setting. The proposed development site is located at sufficient distance that the proposed turbines would not be located within any part of the landscape considered to contribute to the cultural significance of the monument, thus no impact upon their significance is anticipated. Cumulative effects were also considered as a number of wind farms are present in the landscape. These are also at sufficient distance that they do not affect the asset or group of assets' significance. Cumulatively, the existing or proposed developments would not encircle the heritage assets	http://portal.historicenvironment.scot/designation/SM7073
SM7076	Diddles Hill, hut circles & enclosures 800m W of Dalhabhoch	There are many other scheduled monuments outwith the proposed development boundary. In particular, the cluster of settlements on the north-facing slope of Loch Doon Hill would directly overlook the proposed development. It appears likely that a skyline view of Brockloch Cairn from some or all of these sites would be significantly affected by the proposed development.	212380	568808	Scheduled Monument	Within ZTV	Setting that contributes to significance potentially includes the proposed development area. Impact possible in principle	Asset visited for stage 1 screening assessment. It is considered that these archaeological remains are appreciated in their local setting. The proposed development site is located at sufficient distance that the proposed turbines would not be located within any part of the landscape considered to contribute to the cultural significance of the monument, thus no impact upon their significance is anticipated. A site visit to Brockloch Cairn has determined that it is 'views from' the cairn, rather than 'views to' it that are likely to be significant. (i.e. If Brockloch Cairn was intended to be visible from long-distances, it would have been placed on top of Cairn Hill). Cumulative effects were also considered as a number of wind farms are present in the landscape. These are also at sufficient distance that they do not affect the asset or group of assets' significance. Cumulatively, the existing or proposed developments would not encircle the heritage assets	http://portal.historicenvironment.scot/designation/SM7076
SM7356	High Croach, settlement 750m NE of	The monument is an agricultural settlement, dating from the period before the agricultural improvements of the 18th and 19th centuries.	208324	568704	Scheduled Monument	Within ZTV	Change in experience within setting predicted unlikely to affect understanding and appreciation of asset significance		http://portal.historicenvironment.scot/designation/SM7356

Not a hilltop cairn, the asset is experienced in a local setting. A visual change in the setting of the monument would alter how the asset is experienced. The general presence of the proposed development would constitute a material change the setting of the monument but this would not represent an impact on significance. Modern landscape features would not materially detract from an ability to appreciate the location chosen for the monument. The proposed development would not be located within any part of the landscape that contributes to the cultural significance of the monument.

Intervisibility with contemporary cairns within the ISA would be unaffected. The asset is experienced in a local setting. A visual change in the setting of the monument would alter how the asset is experienced. The general presence of the proposed development would constitute a material change the setting of the monument but this would not represent an impact on significance. Modern landscape features would not materially detract from an ability to appreciate the location chosen for the monument. The proposed development would not be located within any part of the landscape that contributes to the cultural significance of the monument.

There are no remains of a church here and no tradition of one in the neighbourhood. The site is more suited to a croft and the name 'Friar's Kirk' is a transferred corruption of 'Fraigh Carraigh' the boundary stone to the SW.

CA330	CABRNYAN		206444	568588	CONSERVATION AREA	Largely outwith ZTV, other than overlap with GDC.	Wider landscape setting of asset contributes to significance. Impact possible in principle	Detailed assessment required	http://www.dumgal.gov.uk/article/15335/Conservation-areas
SM1950	Taxing Stone, standing stone 180m NNW of Little Laight	Prehistoric ritual and funerary: standing stone	206238	570970	Scheduled Monument	Within ZTV	Wider landscape setting of asset contributes to significance. Impact possible in principle	Overlooks Loch Ryan to west. Not interpreted as positioned to have been viewed from the sea, or opposite shoreline. The asset is experienced in a local setting. A visual change in the setting of the monument would alter how the asset is experienced. The general presence of the proposed development would constitute a material change the setting of the monument but this would not represent an impact on significance. Modern landscape features would not materially detract from an ability to appreciate the location chosen for the monument. The proposed development would not be located within any part of the landscape that contributes to the cultural significance of the monument.	http://portal.historicenvironment.scot/designation/SM1950
SM1940	Lingdowey Cairns, cairns S of Cairnrean	Prehistoric ritual and funerary: cairn (type uncertain)	214417	566502	Scheduled Monument	Within ZTV	Wider landscape setting of asset contributes to significance. Impact possible in principle	The asset is experienced in a local setting. A visual change in the setting of the monument would alter how the asset is experienced. The general presence of the proposed development would constitute a material change the setting of the monument but this would not represent an impact on significance. Modern landscape features would not materially detract from an ability to appreciate the location chosen for the monument. The proposed development would not be located within any part of the landscape that contributes to the cultural significance of the monument.	http://portal.historicenvironment.scot/designation/SM1940
SM2186	Finnart's Hill, enclosure	Prehistoric domestic and defensive: fort (includes hill and promontory fort)	205311	574213	Scheduled Monument	Within ZTV	Wider landscape setting of asset contributes to significance. Impact possible in principle	Overlooks Loch Ryan to west. Asset visited for stage 1 screening assessment. Not interpreted as positioned to have been viewed from the sea, or opposite shoreline. The enclosure is considered unlikely to be of domestic function, it being intentionally placed in an exposed landscape position with striking views over the Rhins, Loch Ryan and the sea to the west. The asset has been placed not on a local high point in order to be prominently visible, but on a shoulder contour, to be on the edge of the plateau with vantage views. The asset may have a ritual significance. Whilst the proposed development would cause a visual change in the setting of the asset, the change would be in views to the south east which do not contribute to the asset's significance. No impact is anticipated.	http://portal.historicenvironment.scot/designation/SM2186
SM2287	Cairnrean Fell, cairns	Prehistoric ritual and funerary: cairn (type uncertain)	213862	566202	Scheduled Monument	Outwith ZTV	Wider landscape setting of asset contributes to significance. In terms of third party views towards the cairn, the area was visited during Stage 1 Assessment. The parts of the monument's setting that contribute to its significance is considered to comprise a relationship with the Main Water of Luca. There are no sightlines or specific views towards the monument that would be blocked by the proposed development. The general presence of the proposed development would constitute a material change the setting of the monument but this would not represent an impact on significance. Modern landscape features would not materially detract from an ability to appreciate the location chosen for the monument. The proposed development would not be located within any part of the landscape that contributes to the cultural significance of the monument.	http://portal.historicenvironment.scot/designation/SM5134
SM5135	Pularyan,burnt mound 350m NW of	Prehistoric domestic and defensive: burnt mound	213969	568517	Scheduled Monument	Within ZTV	Change in experience within setting predicted unlikely to affect understanding and appreciation of asset significance	http://portal.historicenvironment.scot/designation/SM5135

SM5477	Finnarts Bridge,cairn 620m SE of	Prehistoric ritual and funerary: cairn (type uncertain)	205776	572521	Scheduled Monument	Within ZTV	Overlooks Loch Ryan to west. The area was visited during Stage 1 Assessment. Not interpreted as positioned to have been viewed from the sea, or opposite shoreline. There are no sightlines or specific views towards the monument that would be blocked by the proposed development. The general presence of the proposed development would constitute a material change the setting of the monument but this would not represent an impact on significance. Modern landscape features would not materially detract from an ability to appreciate the location chosen for the monument. The proposed development would not be located within any part of the landscape that contributes to the cultural significance of the monument.	http://portal.historicenvironment.scot/designation/SM5477
SM5518	Blarbuile,stone setting 330m NE of	Prehistoric ritual and funerary: stone setting	205527	574544	Scheduled Monument	Within ZTV	Wider landscape setting of asset contributes to significance. Impact possible in principle	http://portal.historicenvironment.scot/designation/SM5518
SM5520	Blarbuile,cairn 300m SW of	Prehistoric ritual and funerary: cairn (type uncertain)	205132	574050	Scheduled Monument	Within ZTV	Asset visited for Stage 1 Assessment. Two standing stones are aligned north-south, therefore unlikely to have a celestial or solar significance. Whilst turbines of the proposed development would be visible from the standing stones, their setting is considered to be local, with long distance views not relevant. No impact anticipated.	http://portal.historicenvironment.scot/designation/SM5520
SM5521	Finnarts Bridge,burnt mound 630m SSE of	Prehistoric domestic and defensive: burnt mound	205435	572221	Scheduled Monument	Outwith ZTV	Overlooks Loch Ryan to west. Asset visited for Stage 1 Assessment. Not interpreted as positioned to have been viewed from the sea, or opposite shoreline. The cairn is clearly intentionally placed in an exposed landscape position with striking views over the Rhins, Loch Ryan and the sea to the west. The asset has been placed not on a local high point in order to be prominently visible, but on a shoulder contour, to be on the edge of the plateau with vantage views. The asset may have a ritual significance. Whilst the proposed development would cause a visual change in the setting of the asset, the change would be in views to the south east which do not contribute to the asset's significance. No impact is anticipated.	http://portal.historicenvironment.scot/designation/SM5521

Assets within 10km

Ref	Name	Description	E	N	Status	Bare Earth ZTV	Significance Screen	Appraisal	LINK
GDL00093 / LB10179	Castle Kennedy / LOCHINCH HERITAGE ESTATE, LOCHINCH CASTLE INCLUDING SERVICE RANGE, BOWLING ALLEY, BOUNDARY WALLS AND GATES	Castle Kennedy is located approximately 4km to the south of the proposed development. The asset is one of Scotland's grandest designed landscapes started in the mid-18th century and restored under the supervision of J.C. Loudon in the mid-19th century. It is outstanding on every count and includes a world-famous plant collection, Castle Kennedy - a scheduled monument, several category A listed buildings, and a Site of Special Scientific Interest. It is an extensive and outstanding surviving example of early 18th century formal gardens of terraces and banks set within a wider imposing frame of parkland and surrounding woodland.	210781	562180	Garden and Designed Landscape	Partly within ZTV	Wider landscape setting of asset contributes to significance. Impact possible in principle	Detailed assessment required. The majority of the GDL is screened by topography and woodlands within the GDL grounds which are unlikely to be removed. The assessment will concentrate on designed views towards Lochinch Castle from the driveway approach on the south side of the Loch of Inch (Southern Upland Way) Bare earth ZTV indicates possible visibility from an open field at the south of the GDL; however at this distance (7.6km) any intervening surface vegetation (such as that on Dupin Hill) is likely to screen any view of the proposed wind farm	http://portal.historicenvironment.scot/designation/GDL00093
GDL00192	Glenapp		209417	580450	Garden and Designed Landscape	Partly within ZTV	Wider landscape setting of asset contributes to significance. Impact possible in principle	Hilltop cairn. No effect predicted upon asset significance. Proposed development site is located to NW, therefore not along alignment of chamber. The asset is experienced in a local setting. The proposed development would not be located within any part of the landscape that contributes to the cultural significance of the monument. Prominence unaffected. No impact upon cultural significance anticipated	http://portal.historicenvironment.scot/designation/GDL00192
SM1914	Auld Wife's Grave, chambered cairn, Cairnscarrow	Orientated NE-SW, with entrance at SW end	213538	564990	Scheduled Monument	Within ZTV	Wider landscape setting of asset contributes to significance. Impact possible in principle	Setting relationship with the Main Water of Luce. The asset is experienced in a local setting. The proposed development would not be located within any part of the landscape that contributes to the cultural significance of the monument. No impact upon cultural significance anticipated	http://portal.historicenvironment.scot/designation/SM1914
SM1916	Barlure,cairn		217033	566937	Scheduled Monument	Within ZTV	Wider landscape setting of asset contributes to significance. Impact possible in principle		http://portal.historicenvironment.scot/designation/SM1916

Ref	Name	Description	X	Y	Status	Bare Earth ZTV	Significance Screen	Appraisal	LINK
GDL00407	Lochnaw Castle		199110	562687	Garden and Designed Landscape	Partly within ZTV		Asset visited for stage 1 setting assessment. GDL forms an enclosed and sheltered setting to castle. Screening from topography, and from planting within the GDL prevents and view of the proposed wind farm at ground level. Any view of turbines from castle upper floors would be at a distance of over 10km and to part of the landscape not associated with the GDL, therefore unlikely to affect significance. Kinsale Tower (LB13501, Cat B) occupies the summit of Craighead Hill, may have been a lookout tower that offered views over the Irish Sea back towards Ireland, therefore no adverse impact anticipated	http://portal.historicenvironment.scot/designation/GDL00407
SM1915	Ballach-a-heathry, cairn	Prehistoric ritual and funerary: cairn (type uncertain)	221652	560664	Scheduled Monument	Outwith ZTV	Wider landscape setting of asset contributes to significance. SM90153	Glenluce Abbey	Ecclesiastical: abbey	218468	558636	Scheduled Monument / PIC	Outwith ZTV	No effect predicted upon asset significance.	Outwith ZTV	http://portal.historicenvironment.scot/designation/SM90153
SM90199	Laggangarn, standing stones	Prehistoric ritual and funerary: standing stone	222235	571667	Scheduled Monument / PIC	Outwith ZTV	No effect predicted upon asset significance.		http://portal.historicenvironment.scot/designation/SM90199
LB13498	LOCHNAW CASTLE, WITH TERRACE, GATEPIERS, COURTYARD WALLS, BELL, MONUMENT AND PAVILION		199008	562880	Listed Building A	Within ZTV	No effect predicted upon asset significance.	Asset visited for stage 1 setting assessment. GDL forms an enclosed and sheltered setting to castle. Screening from topography, and from planting within the GDL prevents and view of the proposed wind farm at ground level. Any view of turbines from castle upper floors would be at a distance of over 10km and to part of the landscape not associated with the GDL, therefore unlikely to affect significance.	http://portal.historicenvironment.scot/designation/LB13498
LB13498	LOCHNAW CASTLE, WITH TERRACE, GATEPIERS, COURTYARD WALLS, BELL, MONUMENT AND PAVILION		199132	562825	Listed Building A	Within ZTV	No effect predicted upon asset significance.	The proposed development would not be located within any part of the landscape that contributes to the cultural significance of the monument. No impact upon cultural significance anticipated	http://portal.historicenvironment.scot/designation/LB13498
LB13505	LOCHNAW, WALLED GARDEN		198850	563069	Listed Building A	Within ZTV	No effect predicted upon asset significance.	The proposed development would not be located within any part of the landscape that contributes to the cultural significance of the monument. No impact upon cultural significance anticipated	http://portal.historicenvironment.scot/designation/LB13505
LB6634	OLD WINDMILL, MILL HILL		209027	583221	Listed Building A	Outwith ZTV	No effect predicted upon asset significance.		http://portal.historicenvironment.scot/designation/LB6634
LB869	REMAINS OF FORMER CHURCH		208379	582444	Listed Building A	Outwith ZTV	No effect predicted upon asset significance.		http://portal.historicenvironment.scot/designation/LB869
LB9923	CORSEWALL LIGHTHOUSE, LIGHTHOUSE KEEPERS' HOUSES AND ENCLOSURE WALLS		198075	572614	Listed Building A	Within ZTV	No effect predicted upon asset significance.	The lighthouse is an aid to navigation. Positioned to have been viewed from the sea, the proposed development would be visible in these views. There are no sightlines or specific views towards the monument that would be blocked by the proposed development. The general presence of the proposed development would constitute a material change the setting of the monument but this would not represent an impact on significance. Modern landscape features would not materially detract from an ability to appreciate the location chosen for the monument. The proposed development would not be located within any part of the land or seascape that contributes to the cultural significance of the monument. Prominence unaffected.	http://portal.historicenvironment.scot/designation/LB9923
