

Planning History

Manquhill Wind Farm

A planning application was submitted to Dumfries & Galloway council (reference 23/0692/FUL) in April 2023 for an 8-turbine wind farm with a 200m tip-height.

We appealed 'Non-determination' in November 2023 to the Directorate for Planning and Environmental Appeals (DPEA) of the Scottish Government (DPEA reference PPA-170-2179), which was approved in July 2024.

Our new proposal seeks to increase the heights of the turbines by a further 20m to harness a greater amount of power from wind.
